Hi All,

Thanks to some help from Jack and Anmol, we have made some COVID kits. As stated before, they contain four things.

They are:

Gown for you

Safety glasses for you

Duckbill N95 for you

Face shield facemask for patient

Each truck has 2 complete kits on the back of the stretcher and 3 complete kits where the N95s are placed. Each truck also has a bunch of extra incomplete kits (most of them are just missing the safety glasses which just needs to be cleaned and put into a new kit everytime a kit gets used. Please make sure there are always two COMPLETE kits on the back of the stretcher. Each truck also has extra gowns in that area as well.

104 has two complete kits and one incomplete kit in the center console as seen in the picture.

As stated before, please do not discard anything that you don't use as we are on short supply. If you notice that we are getting low on these kits, please inform me ASAP.

Thank you and stay safe,

Ankit Parikh
